

# Building Vocabulary—Word Families and Word Roots List

## What Is Taught at Each Level?

The following pages show a comprehensive listing of all word families, compounds, and roots **explicitly taught** in each level of *Building Vocabulary*. Many other roots are introduced throughout the levels, but the word families and roots listed on the following pages are each the focus of a lesson. You will notice that some roots that are first taught in lower levels are revisited in the upper levels and are taught with greater depth and complexity.

The first column lists the sound/word family, compound, or root taught. When appropriate, the meaning for this word part is given in the second column (some word parts don't carry meaning; for example, the word families in Levels 1 and 2). Then, an example word is given for each word part. The sample words are intended to give you a sense of how the roots are used—this is not meant to be an exhaustive list of vocabulary words that should be taught.

As students gain more proficiency with *Building Vocabulary*, they will come up with many more words on their own.

Use this list as a reference to see the word families and roots taught at each level. You might also wish to provide students with a copy of the list for the level of the *Building Vocabulary* kit you are using.
